

# Auburn University Intramural Grants Program

The Intramural Grants Program (IGP) is a comprehensive and coordinated competitive grant program that is committed to the advancement of knowledge through basic and applied research, to the enrichment of society through creative initiatives, to promoting faculty research in all disciplines, and recognizing that scholarly activity can take different forms across disciplines. It is designed to support faculty in becoming competitive in securing external funding and sponsorship. Supported projects are expected to result in appropriate scholarly products that will increase the national and international recognition of the awardees, their programs, and the university. New this year: A Cyber Research Grant (Cyber) is offered with additional funding in conjunction with the IGP.
