

## NASA Experimental Program to Stimulate Competitive Research (NASA EPSCoR CAN)

Limited Submission - 1 Week Deadline  
DUE internally, Dec 15, 2016 - 4:45pm

Two selected faculty/researcher proposal from AU will be allowed to apply for this grant of up to \$750K for three years. You apply by first submitting a white paper. An internal AU committee established by the OVPR will review the white papers and select two for full proposals to ASGC (Alabama Space Grant Consortium, offices at UAH in Huntsville). ASGC next conducts a formal review of proposals and ranks AU proposals among all submissions by the six other ASGC institutions in the state, and then submits the two highest ranking proposals as the "state package" to NASA to compete against the highest ranking proposals from all other EPSCoR states.

If you have any questions, please contact David Beale at 844-3336.

## IGP Application Period Closes Monday Dec. 12

The Intramural Grants Program (IGP) deadline of December 12, 2016 (4:45pm) is rapidly approaching. As cost sharing is required, please make sure you've cleared your applications with your ADR. A comprehensive list of resources including the link to the application can be found on the [IGP website](#).
