Open to All Graduate Students

Carey Andrzejewski, PhD

Emily R. and Gerald S. Leischuck Endowed Professor

College of Education

Education and Training Consultant

Office of Research Integrity and Compliance

This course prepares graduate students to navigate ethical challenges likely to emerge when conducting research, including matters related to human and animal subjects, data management, peer review, and authorship. The course also examines fundamentals of the broader research environment, including collaboration, mentorship, regulations, intellectual property, and responding to suspected wrongdoing.
