

AU/AUM SCHOOLS OF NURSING

MISSION

The mission of the School of Nursing is to foster and exemplify excellence in teaching, service/outreach, and research. The program prepares professional nurses to provide patient – centered, culturally competent, evidence based care for diverse populations in a dynamic health care environment. Baccalaureate graduates are ready to assume leadership roles in the provision of nursing care in all health care settings. Master’s graduates are ready to lead in educator and advanced practice nurse roles in health related services to diverse populations.

AU/AUM MSN PROGRAM

Curricular Outcomes

1. Demonstrate strategies that improve collaboration and communication among team members, patients, patients’ support networks and health care professionals to design, coordinate and evaluate the delivery of patient care (III,VII, X-, 15)
2. Use information and communication technologies in advanced nursing practice to enhance patient education, expand accessibility of care, analyze practice patterns, and improve nurse sensitive outcomes. (Essential III, V, VII, X-6)
3. Apply advanced nursing concepts in the comprehensive and systematic assessment of health and illness in complex situations, care environments, and actual and potential risks in diverse populations (I,III, VIII, X-1,2,3)
4. Integrate clinical judgment, evidence based findings and theory while implementing health care policies that improve access, equity, efficiency and social justice in the delivery of health care. (I, IV, VI, VIII, X-4,5, 18)
5. Design strategies that promote lifelong learning of self and mentoring of peers that include the incorporation of professional nursing standards, relevant statutes and regulations and accountability into practice. (IV, IX, X-7, 16)
6. Adapt advanced practice knowledge of illness, disease management, clinical prevention and population health concepts to care delivery in response to global factors, e.g. international law, public policy, geopolitics, and geo-economics. (VI, VIII, X-9, 13, 17)
7. Provide ethical, culturally sensitive, patient centered care based on epidemiological, social and environmental data to improve health status of patient populations in an advanced nursing role independently and collaboratively with professionals from multiple disciplines. (VII, VIII, IX, X-8,12)
8. Apply leadership knowledge and skills in economics of care, managing micro-, meso-, and macro- systems of care and evaluating continuous quality improvement processes. (II, III, X-7,14)

9. Incorporate core scientific and ethical principles in assisting patients and other health care providers in identifying and addressing potential and actual ethical issues arising from the use of technologies in patient care. (IV, V, IX, X-10)
10. Design innovative educational programs for patients, families and interprofessional health care teams using teaching and learning principles. (V, IX, X-5,6)
