

Near-Miss Laboratory Incident Reporting

This form is used by RMS (Laboratory Safety) to evaluate/ identify risks, hazards, systems or procedures that contributed to a near-miss lab incident. Lessons learned from such incidents will promote safety awareness at Auburn University teaching and research laboratories.

This form does not replace the [On Job Injury Reporting](#) for work related injuries.

Date of Incident

Completed By:

E-mail address

Location of Incident

Check/ complete the following based on the type of near-miss incident

Unsafe act

Unsafe condition

Unsafe equipment

Unsafe use of equipment

Events where safety equipment/barrier was challenged or failed

Minor incident (not reported to OJI) that had potential to be more serious

Events where injury could have occurred but did not
